Cette monographie a particulièrement pour but la connaissance de l'un des genres les plus riches et les plus	
intéressants de la classe des Mollusques. L'auteur établit d'abord les caractères de genre, et s'attache à en décrire	
toutes les espèces, dont plus de la moitié était encore inédite. M. S-Rang fait connaître, touchant les mœurs, les	
habitudes et les propriétés de ces animaux, tout ce qu'il a eu occasion d'observer pendant le cours de plusieurs	

habitudes et les propriétés de ces animaux, tout ce qu'il a eu occasion d'observer pendant le cours de plusieurs voyages sur mer; et afin de rendre son ouvrage complet, il a ajouté à ses propres observations tout ce que les auteurs anciens et modernes ont dit sur les Aplysies.

Histoire naturelle des Ptéropodes, monographie complète de ce genre de Mollusques, par MM. Sander-Rang et Souleyet, Paris, 1851, 4 vol. grand in-4°, avec 15 planches coloriées.
